

# **UNCERTAINTY**

## ***Paintings by Rosalind McKelvey Bunting***

***'The more precisely the position of a particle is determined, the less precisely the momentum is known in this instant, and vice versa.'***

- Werner Heisenberg, Uncertainty Principle Paper, 1927

Spanning the 20<sup>th</sup> and 21st centuries scientific and philosophical theories of uncertainty emerged. In 1927 German Physicist Werner Heisenberg published the Uncertainty principle. This theory supports my belief that nothing in our reality, material or non-material, is ever fixed. Everything is susceptible to countless influences and therefore is in a constant state of flux. If uncertainty is accepted more in human perception, we only open ourselves to more possibilities and greater knowledge without the limitations of attachment.

The kaleidoscope demonstrates how we can completely change our perception of what is in front of us; it gives us a vital ever-changing perspective. When I paint I use the kaleidoscope. The slightest shift in the subject or myself is revealed and I record these changes in patterns and colours.

To those who choose not to work with uncertainty the artworks are simply able to provide an insightful meditative space. The complex patterns and luminescent colours of these works are well matched to offer support and balance within demanding workplace and academic environments. They hold therapeutic qualities individually for each who views them.

***Ever since I can remember I have been a painter. I am fascinated by the power of colour and line to communicate, which I attribute to my interest in the emotional aspects of drawing and painting. Always drawn to the human figure and its psychological circumstance, I am dedicated to furthering my ability to paint in both figurative and abstract forms.***

***This series is the result of an outburst of excitement from discovering my own visual language through the kaleidoscope. I quickly came to value the medium as providing an infinite vocabulary for expression.***

***Supported by the Sydney University Law Society as part of the Yemaya POP-UP Exhibition Series.***

***With special thanks to The Sydney Law School, Sydney University Museums and to Julia Xi Bing Su, 2011 Women's Officer of Sydney University Law Society***
